Subject: Could you please review this revised version for technical accuracy?
Attachments: 2018-12-12 Parcel G Work Plan Version 2018-11 - EPA Comments Technical Details Track Changes.doc

Dear Karla,

I have made edits to the draft for style, tone, length, repetition, etc. Please review it to make sure I did not unintentionally change any technical substance.

Please check a few substantive changes below:

In addition, we wrote this last year about Cobalt 60 (Co-60): "The Navy ceased Shipyard operations in 1974, 42 years ago. The half-life of Co-60 is 5.26 yrs. After seven to ten half-lives (i.e., 37 to 53 years), remaining radiological activity would be at levels similar to background. Therefore, Co-60 is not a priority health and safety concern, and any Co-60 sampling conducted would not be a helpful indicator of potential prior falsification." So I adjusted the language accordingly.

Gen Comments 11 & 12 – I think you agreed to 10% sampling for Pu-239, so I deleted.

Thank you!

- Lily
